	<p>empower their financial freedom. According to the voyager whitepaper, the platform aims to resolve the following problems traders and crypto stakers encounter when trading on various exchanges.</p> <p>Simplicity: Trading and buying cryptocurrency in the crypto market involves complexities and can be confusing for stakers.</p> <p>Solution: Voyager has created an easy-to-use application that simplifies and automates advanced crypto trading, staking, and earning rewards.</p> <p>Liquidity: Unlike stock trading, there are challenges relating to price discrepancies across the crypto market. In addition, for crypto-asset exchanges, the order book is subject to price volatility and slippage and is relatively thin.</p> <p>Solution: Voyager connects to multiple exchanges and liquidity providers to bring in liquidity, thereby aggregating prices across markets and executing order flow in seconds. Further, Voyager offers Smart Order Router technology that aims to quickly fill orders and lock in prices by processing data in real time.</p> <p>Fungibility: Presently, the crypto-asset ecosystem is bisected from traditional assets. This creates a lengthy and challenging process to exchange traditional currency into crypto assets and back into traditional currency.</p> <p>Solution: Voyager is aiming to bridge equity markets, real-world assets, and crypto assets by designing a new frontier of fungibility.</p> <p>All-in-one: Certain platforms require converting traditional currency to crypto assets on one platform and then transferring those assets elsewhere to earn competitive yield rates or acquire other crypto assets.</p> <p>Solution: Voyager empowers crypto stakers to gain broader access to the crypto markets by offering an easy traditional currency on-ramp and off-ramp, a yield reward program, and an altcoin selection. Through these features, Voyager aims to provide an easy-to-use and all-in-one destination.</p> <p>With the solutions mentioned above, Voyager creates more choice, transparency, and a cost-efficient alternative for trading crypto assets.</p> <p>VGX (Voyager Token) is the native utility token of the platform. The token is designed to reward Voyager customers for their loyalty, motivate community members to participate in the multifaceted rewards functions of VGX, and hold VGX in their Voyager accounts.</p> <p>To grow further, in 2021, Voyager token underwent token swaps and mergers and created VGX 2.0. The token functions on the Ethereum blockchain as an ERC20 and boosts the crypto earning potential even higher with 7% staking rewards. Furthermore, VGX 2.0 token offers twofold benefits of rewarding and incentivizing customers for their organic behaviors and actions on the platform.</p>
	<div><div>History of Voyager Token (VGX)</div><div><p>Steve Ehrlich, Phillip Eytan, Oscar Salazar, and Gaspard de Dreuzare are the founders of Voyager token. Ehrlich is the CEO and was previously the CEO of Tradier, Inc., a financial technology firm. Eytan is a serial entrepreneur and cofounded Pager, a digital health start-up. Oscar Salazar is the cofounder of Uber as its founding architect and CTO.</p><p>Voyager Digital Ltd. and its subsidiaries, collectively referred to as Voyager, is the developer of Voyager (crypto-asset platform). Proceeding to the native token, VGX has its roots in the Ethos Token (launched in 2017). Voyager acquired Ethos.io in 2019 and incorporated the technology, team,</p></div></div>

expansion plan, the native tokens of voyager were integrated into a new single token model (VGX

How Are New Voyager Tokens (VGX) Created?

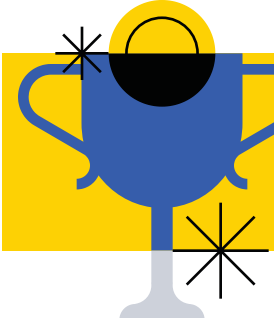

Voyager offers the Voyager Loyalty Program, an expanded rewards program that involves automatic enrollment of customers followed by staking and earning VGX. Through the program, customers can earn VGX rewards and achieve and maintain other reward benefits on the platform. Further, by staking more VGX 2.0, users can scale up the reward tiers in the loyalty program on the platform. These tiers ascend from Adventurer to Explorer to Navigator. To qualify for the Voyager Loyalty Program, customers simply need to maintain a balance of VGX 2.0 in their Voyager account.
